

Password Reset Guide

Users can reset passwords from the login page using Forgot Password. Reset links expire after 30 minutes and can be used once. If the email does not arrive, check spam folders, corporate email filters, and whether the email address matches the workspace account.

Troubleshooting Steps

- Open the login page and click Forgot Password.
- Enter the exact account email address.
- Check spam, junk, and corporate quarantine folders.
- Wait a few minutes before requesting another link.
- If there were five failed login attempts, wait 15 minutes for temporary lockout to clear.
- Support can verify lock status but must never ask for the user password.

Escalate if password reset fails after the documented steps, if the account appears locked beyond the temporary lockout period, or if account ownership is disputed.
